

Fun activities for kids to learn about money at home

Most people didn't get to learn about financial literacy when they were kids, but thanks to Netwealth and Banquer, over 64,000 children in Australia have received financial education through Banquer Primary.

This holiday break, Banquer have provided some fun activities to keep the kids entertained and learning about money at home.

The activities are inspired by Banquer's classroom resources and are used by hundreds of teachers nationwide. They are designed to support parents in giving their children some

financial education at home and are ideal for kids aged 7-13.

The activities range from exploring life's unexpected events to managing everyday expenses, budgeting, and eliminating debt through a combination of interactive videos and instructional slides.
